

NEW CAMPAIGN : 'Dare to Think Differently' – Re-Energising the UK's Youth

Let's challenge young people's thinking about Brexit and other issues using facts

Our youth are heavily in favour of Rejoin – we must inform them how much Brexit helps them

This campaign will also address other policy areas and challenges young people to be open to new ideas and facts – we are sure they will rise to the challenge!

There's no question about it. The UK's young people are heavily in favour of rejoining the European Union, according to all the polls. This is perhaps unsurprising, given that 75% of their teachers and nearly 90% of their lecturers voted Remain. [Source: Times Higher Educational Supplement].

The anti-Brexit bias of our educators carries over into other areas of social and political life. For decades our young people have been influenced by those they listen to most – and who simply do not reflect the views of the country at large.

New campaign : 'Dare to Think Differently' – Re-Energising the UK's Youth

Today we start the fight back, together with our affiliate [Brexit Facts4EU.Org](https://BrexitFacts4EU.org).

CIBUK and Brexit Facts4EU are launching a new campaign, aimed

at reclaiming the hearts and minds of the young people of our country. We aim to do so via a simple appeal to young people to be open-minded and inquisitive – as most young people are – and to ask them to read some basic facts which may surprise them.

We plan to address the misinformation our young people have received from their teachers and lecturers, step-by-step, building a mini-library which pupils and students can access for free. It will offer summaries of key facts researched (as ever) from official sources. The information will challenge what they are being taught and will give them the chance to make up their own minds on any given topic.

This campaign's first set of '**Dare to Think Differently**' reports will be published tomorrow. Appropriately, it starts with student exchanges, on which we have excellent news for all the UK's young people in schools and in higher education.

Offer of three internships

As part of this campaign, Brexit Facts4EU.Org is offering three part-time internships to young people, mentored by our Chairman. Whilst these are unpaid positions, this is a valuable opportunity to learn and to apply your influence to our output during this project. Working virtually, you will be expected to attend a weekly Zoom meeting where you can put forward your ideas. You will learn a great deal about the media and about political thinking.

You can apply [here](#). Your application will be judged purely on what you think our Chairman will want to know about you!

The effects of years of indoctrination are now being seen in our daily lives

In our society as a whole we are now starting to see the effect of decades of indoctrination by our educators, which has resulted in some of the astonishing developments in recent years.

A high profile example of this has occurred in the last couple of weeks, as we have all learnt how our banks now see themselves as moral and political arbiters and censors, instead of simply providing the banking services which their shareholders might expect them to be focused upon.

Like him or loathe him, Nigel Farage was 'de-personed' by his bank and then by 11 other banks to which he applied for normal banking services. We now know this was because of his perfectly legal political views.

Even the Prime Minister spoke out against this and the City Minister, Andrew Griffith MP, is due to speak to all the banks next week, with new legislation to be introduced.

The question our new campaign addresses is 'How

can we stop these outrages before they start'?

We believe that those who would have a foreign, unelected body (the EU Commission) deciding our laws, and those who wish to create a homogeneous society where freedom of legal expression becomes outlawed or results in vile personal attacks, must be stopped.

And this starts with our young people who have been indoctrinated by our educators for decades. We leave the immediate need to legislate to our legislators, but we must go to the root cause or this will get far worse. The UK's young people of today will create our society of the future – and we don't want a totalitarian one, thanks. If we wanted that we would go to live in North Korea, Afghanistan, China, Iran, or Russia.

Observations

We believe in plurality and freedom of expression under the law. If you share our views and can help us by backing this major new campaign with a donation, it will help us to make this campaign as effective as it possibly can be.

We must start somewhere. Let's do something about this!
