Below, in a worldwide exclusive, we provide readers with the film of the Expert Panel session which followed the première of the main movie. We have also summarised all the clips of the main documentary we have prepared to date.

Whether you have 40 seconds or 40 minutes, there is something for everyone!

To come

In the course of these productions we filmed a great deal more from each of the guests who appear in the main movie. In an ideal world we would like to produce a series of 10-minute films, with each one featuring a key participant. This will allow you to hear our guests expounding on some very important points in relation to the UK's independence and its place in a changing and challenging world.

These guest speakers all have a lot to say and we believe readers will want to hear it ! At present, however, we simply do not have the funds to do this. Please help if you can by donating here.

Here are the first five we would love to produce

- Nigel Farage
- Sir John Redwood MP
- David Jones MP
- Barney Reynolds (EU law expert)
- Ann Widdecombe

Observations

CIBUK.Org and Brexit Facts4EU.Org remain very grateful to all those politicians, lawyers, economists and academics who gave up their time in the making of all these films.

As the Rt Hon David Jones MP put it to us, *"I think what this film does and does very successfully is lay out what the problems are so that we can understand how they should be addressed."*

In many ways this project was our 'stake in the ground'. These films will live on, thanks to the Internet, and we hope they will continue to grow in popularity. As our guest from Washington DC, Dr Nile Gardiner, added: *"Thank you for all the work that you've done on the documentary, which is fantastic. I hope that eventually millions of people get to watch this."*

Nile is of course right, but we can only achieve this with help from our loyal readership. Please do everything you can to promote this article with all its links. After so much work we must ensure the maximum possible audience.

We must get reports like this out there.
