

VIDEO : BBC finally goes nuclear in its attempts to destroy Brexit

We demolish anti-Brexit BBC's "Rejoinder Ros" programme, using official facts

PRESS RELEASE - IMMEDIATE

Commenting, the Rt Hon Sir John Redwood MP told us:
"The relentless anti-Brexit lines from the BBC are absurd."

The BBC plumbs new depths of bias, in dire broadcast we're reporting to OfCom

So much for BBC impartiality.

We highlight an extraordinary programme from the BBC's Ros Atkins on Friday whose message is simple and unambiguous: Brexit is an economic disaster.

So blatant is this latest piece of anti-Brexit propaganda that CIBUK.Org and Facts4EU.Org are reporting it to OfCom as a serious breach of the BBC's Charter and have suggested that all readers do the same.

CIBUK (<https://cibuk.org/>) – the oldest-established organisation for independence, freedom and democracy in the UK – along with its affiliate [Facts4EU.Org](#) – exposes the unconcealed bias behind the BBC's latest report along with a detailed rebuttal of their claims.

The anti-Brexit premise of this BBC programme was clear from the outset

Ros Atkins started with:

"Mr. Sunak wants to build the economy, but there's no shortage of people who say that Brexit isn't helping to do that."

He then went into his first clip of an unnamed person on TV saying:

"Brexit is and was and will be a total disaster. Brexit is doing the economy real damage."

Sir John Redwood MP was scathing about the BBC, in his comments to us

Commenting exclusively on our report today, the former Secretary of State and former Single Market Minister said:

"The relentless anti-Brexit lines from the BBC are absurd.

"Brexit is blamed for many of the energy, inflation and economic problems we face yet these problems are greater on the continent where many of them started."

- The Rt Hon Sir John Redwood MP, Sun 30 Oct 2022

In our report we show that only one side of the argument was presented, that only economic commentators who favoured the programme's view were interviewed, and that none of the official data countering the BBC's pre-determined agenda was presented.

We present the facts and 'at-a-glance' charts, showing clearly how the BBC got it so wrong. [Click here for this summary report](#)
